German Democratic Republic [REDACTED] 25X1A

25X1A VVB RFT INSTRUCTIONS FOR TESTING ROTARY INDICATOR (2pp; German; [REDACTED] document distributed on

30 January 1953)

25X1X [REDACTED], 25X1X

The attached document concerns a rotary indicator
25X1A for gyrocompass installation. Twenty of these indicators were
delivered by the Askania Works, Teltow.

This document is a photostat copy of a set of instructions, dated 21 June
1952 and prepared by the VVB RFT (Administration of People-Owned Enterprises
for Radio and Telecommunications), for testing a rotary indicator, type 70/80/4.
The instructions pertain to the testing of the individual parts as well as
to the testing of insulation resistance, maximum moment of rotation (Drehmoment)
and other properties of the instrument. /Parts of this document are illegible./
